ELEMENTS OF A SUCCESSFUL MEDICAID RECOVERY PROGRAM

Medicaid Recovery Network by Stellarware Corporation

Medicaid Recovery Network

Innovation for today's Medicaid recoveries

ORIGIN & MECHANICS

The **Medicaid Recovery Network (MRN)**, originally the Medical Assistance Intercept System (MAIS), was designed to address Article 11 of the Rhode Island FY13 Budget law (P.L. 2012, Ch. 241), which created R.I.G.L. Chapter 27-57.1, the Medical Assistance Intercept Act. **The daily electronic matching of Medicaid recipients with liability and workers' compensation claims allows MRN to easily identify qualified claims early in the claim lifecycle and as a result, allows states to recover greater medical claim costs from insurers at the time of settlement**. **Rhode Island** was the first member to join the program in **2012**, followed by **Texas** in **2018**. Since its launch, MRN has become an invaluable solution for states to mitigate overall medical assistance claim costs. In 2026, Texas expanded its relationship with Stellarware by awarding the company a contract to support the State's Medicaid Estate Recovery Program (MERP). The award further positions MRN as a comprehensive Medicaid recovery solution capable of supporting state agencies across multiple recovery programs, data environments, and operational workflows.

01 Personal injury & workers' compensation claims are matched daily against Medicaid recipient database

02 Data exchange is performed with MMIS to identify related medical claims

03 MRN completes QA activities on matched data and validates matches

04 MRN issues lien / notice of Medicaid recipient to insurer & attorney

05 Medical claim costs are collected by states from insurers at time of settlement

FEATURES

Robust Data Matching
Matches with a database of over 1.7 billion claims from the insurance industry daily

Interactive Look-Up Function
Using MRN's lookup function, insurers and attorneys can see whether claimants are on Medicaid in real-time

PERFORMANCE

5.8M
Overall insurance claims processed

11.5M+
Medicaid recipients in the system

502K+
Notices of subrogation generated

QUALITY ASSURANCE

MRN's **rigorous** QA process ensures the **highest level of qualified, matched claims**, verifying claim status as well as insurer and attorney contact information.

COST BENEFIT ANALYSIS

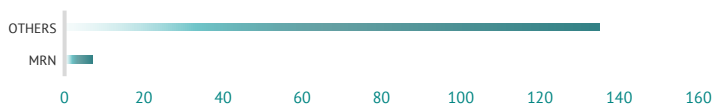

The MRN program practically pays for itself with a return-on-investment as high as

10:1

States using MRN have realized, and continue to realize, **significant cost savings** on behalf of their department(s)

THE MRN ADVANTAGE

MRN's claims workflow has a **lifecycle of 2-7 days** whereas other subrogation processes extend well beyond 130+ days

IMPLEMENTATION

MRN is a **highly customizable, turn-key solution** allowing for **seamless** and **timely** implementations alongside other systems, or as its own web-based tool. **To learn more**, please contact us at contact@medicaidrecoverynetwork.com.
