Medicaid Recovery Network

Innovation for today's Medicaid recoveries

ORIGIN & MECHANICS

The **Medicaid Recovery Network (MRN)**, originally the Medical Assistance Intercept System (MAIS), was designed to address Article 11 of the Rhode Island FY13 Budget law (P.L. 2012, Ch. 241), which created R.I.G.L. Chapter 27-57.1, the Medical Assistance Intercept Act. **The daily electronic matching of Medicaid recipients with liability and workers' compensation claims allows MRN to easily identify qualified claims early in the claim lifecycle and as a result, allows states to recover greater medical claim costs from insurers at the time of settlement.** **Rhode Island** was the first member to join the program in **2012**, followed by **Texas** in **2018**. Since its launch, MRN has become an invaluable solution for states to mitigate overall medical assistance claim costs.

FEATURES

Robust Data Matching

Matches with a database of over 1.7 billion claims from the insurance industry daily

Interactive Look-Up Function

Using MRN's lookup function, insurers can see whether claimants are on Medicaid in real-time

PERFORMANCE

2.8M+

Overall insurance claims processed

10.2M+

Medicaid recipients in the system

352K+

Notices of subrogation generated

QUALITY ASSURANCE

MRN's **rigorous** QA process ensures the **highest level of qualified, matched claims**, verifying claim status as well as insurer and attorney contact information.

COST BENEFIT ANALYSIS

The MRN program practically pays for itself with a return-on-investment as high as

10:1

States using MRN have realized, and continue to realize, **significant cost savings** on behalf of their department(s)

THE MRN ADVANTAGE

MRN's claims workflow has a **lifecycle of 2-7 days** whereas other subrogation processes extend well beyond 130+ days

IMPLEMENTATION

MRN is a **highly customizable, turn-key solution** allowing for **seamless** and **timely** implementations alongside other systems, or as its own web-based tool. **To learn more**, please contact us at
